

# Closing the gap between physical and mental health.

Mental health conditions are common and difficult to manage in a hospital setting. They can cause distress and prevent patients from healing. **PRIME Medicine is here to help.**

## What is PRIME Medicine?

PRIME Medicine stands for Proactive Integration of Mental Health Care in Medicine. We are an inpatient consultation service that incorporates mental health care into hospital medicine to optimize patient care and improve outcomes.

We collaborate with physicians and nurses specializing in hospital medicine to identify and address mental health conditions that could affect patient care or would otherwise go untreated.

In addition to offering formal psychiatric consultations, we also:

- Screen all patients during admission for mental and behavioral health conditions
- Manage mental health conditions in collaboration with the patient's care team
- Arrange outpatient mental health services

**PRIME Medicine serves Strong Memorial Hospital Units 6-1200, 6-1600, 6-3600**

## Our Team

**Robert Dill, PMHNP-BC**  
Nurse Practitioner  
Pager: (585) 220-1839  
*Primary Contact*

**Carrie Bihl, LMSW**  
Social Worker  
Pager: (585) 220-4801

**Mark Oldham, MD**  
Assistant Professor of Psychiatry,  
Medical Director, PRIME Medicine
